The Yellowstone River is the longest free-flowing (undammed) river in the contiguous United States. The longest river in the U.S. by miles, the Missouri River, begins in Montana at the "Three Forks" - the intersection of the Gallatin, Madison and Jefferson Rivers. Flathead Lake is the largest fresh water lake west of the Mississippi River.

Montana's largest county by population is Yellowstone County, home to almost 159,000 people according to 2017 estimates. That's 35 percent more people than the next most-populated county (Missoula), and 300 percent more than the least-populated county (Petroleum). Approximately 1 in 7 Montanans live in Yellowstone County.

The president Lincoln, who was assassinated on April 14, 1865, had signed legislation to create the U.S. Secret Service hours before he headed to Ford's Theatre. However, the Secret Service wouldn't have saved Lincoln had it been created in time - the original purpose was to combat widespread currency counterfeiting. It wasn't until 1901 that its M.O. was to protect the president.
